## **Mac Victor Power announces the Mac Victor 2.0**

**Fredericksburg, VA (May 30, 2008)** – Mac Victor Power, LLC announces that it has introduced the Mac Victor 2.0, an ultra high quality, wall mounted, dedicated and isolated power supply for hard wiring to remotely located critical electronic loads and / or Isolated Ground (IG) receptacles. An optional product offering (shown in product photo) also provides factory installed IG receptacles for critical electronic plug-in loads that are located adjacent to the mounting location of the Mac Victor 2.0.

Available in both 2kVA and 3kVA (120Vac, 1PH) models, the Mac Victor 2.0 provides integrated input & output surge protection, transformer based power line conditioning, electrical noise filtering, and up to 5 Square D QOU type output circuit breakers for electrical distribution to remotely located critical electronic loads / IG receptacles. Input and output power status is indicated by front panel mounted pilot lights and also internal form-C relay contacts for remote status signaling.

Battery Backup (UPS) capability can be added to the Mac Victor 2.0 with factory installed plug and receptacle UPS connectivity and an integrated mounting shelf on top of the enclosure. Front and back slots are providing with the shelf for strapping the UPS after installation. A UPS maintenance bypass switch is provided with "make before break" technology to prevent any output flicker while switching.

The true on-line, double conversion UPS manufacturers / models that are compatible and listed with the Mac Victor 2.0 are the 2kVA and 3kVA sizes of the General Electric GT Series, Eaton Powerware 9120 Series, Liebert Emerson GXT2 Series, Oneac Sinergy II Series, and the Chloride Active Series.

The primary applications for the Mac Victor 2.0 are Point of Sale (POS) and back office local area networks (restaurant, convenience store, retail), industrial control panel automation logic (process control, wastewater treatment) and medical (patient monitoring centers, clinical labs).

The Mac Victor 2.0 is UL 1778 Listed, 4<sup>th</sup> edition, UPS maintenance bypass and line conditioner accessory and is also available in CUL listed models (Canadian Underwriters Laboratories).
